 Need One 2" Vase Cap
 Sold Separately

Lamp

Color	Key	Description	Glass Type	Sq. Ft.
	LP	Lotus Pads	Olive Green Opal	.5
	FP	Flower Petals	Pink and White Opal	.25
	W	Water	Blue Opal	.25
	DYY	Dark Yin-yang	Dark Opal	.1
	LYY	Light Yin-yang	Light Opal	.1
	FC	Flower Center	Yellow Opal	.1
	ST	Stem	Light Green Opal	.1

The yin-yang symbolizes the symbiotic relationship between opposites (i.e. dark and light; low and high; water and fire; male and female). The lotus flower, shown in full bloom, is a beautiful spiritual symbol.

MINI FORM CONSTRUCTION TIPS

MagicStrip™ Installation

Center arrow over molded vertical line & leave the space of the molded lines between each strip.

Foil Wrapping Small Pieces

When foiling small pieces such as flower centers, flower petals, and leaves, it is best to overlap foil on glass approximately 1/64"; wider foil will cover too much of the glass. The exception is on small pieces at the top of the lamp. These pieces should be wrapped with at least a 1/32" overlap. Increasing the size of the overlap adds strength to the lamp. If you have foil that is too wide, it can be easily trimmed with scissors. Leave the paper backing in place while trimming. the untrimmed edge is placed on the outside for nice even seams.

Copper foil is easily trimmed. Leave backing on.

Wear heavy leather gloves

10, 12, or 14 gauge copper wire or BRAIDED WIRE.

Copper wire covered with solder

Reinforce Top

Remove the lamp from the form. To reinforce the aperture opening solder a loop of copper wire inside. Use size 14, 12, or 10 gauge, cover with solder. Use leather gloves to hold wire.

Vase Cap Tips

Center, level and tack solder the vase cap in the aperture opening, and firmly attach with solder seam. Wash and rinse thoroughly. Apply antiquing after vase cap has been installed and all soldering completed.

Solder brass holder ring in place of vase cap.

Lamp holder fits over the brass holder ring.

Reinforce Bottom

To reinforce the bottom edge bend and solder on short pieces of copper wire, cover with solder. Use same gauge wire as at top. Braided wire can also be used; especially around uneven bottom borders.

Use a heavy leather glove or plier to hold the wire in position.

Even bottom border

Irregular bottom border
